

This is Matt Huck, CEO – Truth & Facts Never Lie’s responding to Bob Gill’s comments on January 11, 2017 which you will find added below. This response from Bob Gill pointed out my need to respond to Cincinnati Bell Telephone Company’s response posted on January 6, 2017 as well. Mr. Gill’s comments were focused on my grammar and that I shouldn’t be taken seriously. I believe people’s health and lives are more important than grammar.

May I ask, “Would you be concerned on the proper way to stop traffic if a child was in the middle of a street? Would you take the time to summons a police officer to ask for permission to run out into traffic to rescue the child?” I wouldn’t. Action is needed and not perfection. How the child is saved does not need to be perfect.

My grammar is not perfect. No one is perfect. However, I will not let that stop me from doing what is necessary and that is to bring to the attention of the people what the wireless industry with our government’s help plan to do. Together, they intend to discontinue all landline phone service. This is serious! We must not let them do this. It will start out with what seems to be insignificant, but will ultimately end with the discontinuing of all landline phone service. To give an example of this you can locate an article on the internet at <http://stopthecap.com/2013/07/08/fcc-landlines-will-only-exist-another-5-10-years-att-wants-out-by-2020/> called, “FCC: Landlines Will Only Exist Another 5-10 Years, AT&T Wants Out by 2020.”

People need to know this and my letter was a blanket letter and not a letter of specifics. It opens the door for people to get informed. We must stay informed and let our voice be heard. Many dockets begin with something like: ‘*Wireline Competition Bureau Copper Retirement Network Change Notification*’ filed by whomever. This is just the beginning of the end for landline phones, unless we the people speak up. Those that do not have copper retirement in the title do reference to discontinuing it and refer people to wireless somewhere in their application. Cincinnati Bell Telephone’s application to the FCC is an example of this. Wireless companies are coming in the back door of wired phone companies.

Let me point out some of those who have lost their lives or their health because we failed to do our jobs to protect the health and well-being of everyone.

1. Please do not forget Attorney Jimmy Gonzalez from Florida who died of three cancers all related to where his cell phone was. (<https://youtu.be/lzOjK6PHUas>)
2. Do not forget Alan Marks who won a lawsuit that enabled the city of Berkeley to warn cell phone users from his experiences of having a cell phone for over 20 years. A brain tumor specialist in Sweden remarked how Alan was “*the poster boy*” for people about the increased risk of one developing cancer due to their prolonged cell phone activities. (<http://www.jweekly.com/article/full/58831/cancer-calling-east-bay-couple-on-a-mission-to-warn-of-cell-phone-risks/>)
3. Do not forget Paul Prischman who died at the age of 42 due to a cell phone induced cancer. (<https://www.youtube.com/watch?v=aBwk4WbM6CA>)
4. Do not forget about Virginia Farver who lost her son Rich Farver at the age of 29 to glioblastoma multiforme (GBM) brain cancer on October 11, 2008 which was a direct consequence of having a cell phone. This cancer was in direct location of where Mr. Farver held his cell phone. (<http://mieuxprevenir.blogspot.com/2012/11/san-diego-state-university-brain-cancer.html>)

5. Do not forget Traci Frantz who is the mother of Tiffany Frantz at the age of 21, developed breast cancer in the exact location of where she kept her cell phone. In fact the images of her cancer outline the exact size of her phone on her chest and how it laid upon her. Where in March of 2013 it had metastasized to her hip, pelvis, spine, sternum, and skull where she underwent surgery and radiation to combat this only to be informed in June of 2014 that this has also metastasized to her liver.
(<https://youtu.be/ZWN838VCUv4>)
6. Do not forget Donna Jaynes at the age of 38, developed breast cancer exactly where she kept her cell phone. (<https://youtu.be/BJib5GHxOsE>)

All these people's lives destroyed because of the wireless industry and because of the government's failure to protect its citizens. The United States Government allowed the telecom industry to put into place an escape goat clause in the Telecommunications Act of 1996 that they cannot be held liable for any health related issues. Since then this has helped to keep the wireless industry profitable at the expense of people's lives including the health of this nation's children. This violates our human rights
(<http://www.electricalpollution.com/documents/WirelessViolatesHumanRights2016.pdf>).

Thank you for your time

Matt Huck

RE: Your FCC letter regarding the wireless industry.

First, I would advise you to figure out how to format things correctly, form correct sentences, avoid run on sentences and use correct wording in your documents, or find someone else to do it for you.

It removes all credibility when I read something that is barely using proper English, is extremely hard to follow, poses questions in statement form, statements in question form, has sentences with multiple ideas in them and uses words that are incorrect and don't make sense in the context. Your letter is literally barely readable.

A good idea can be ruined by poor execution. If you're going to go big and public about your opposition then please don't embarrass yourself with simple mistakes.

Second, you should be familiar with the terms and technologies that you are writing about. Cincinnati Bell is requesting to discontinue their Local Area Service - do you actually know what that is? Because based on your letter to the FCC you have demonstrated that you are utterly clueless.

The LAS is simply a service that runs over POTS, not a physical line or infrastructure, that lets customers make local calls. They are discontinuing LAS and putting customers on Extended Area Service - which means that instead of those customers only being able to call locally without charge, they will now be able to call in the extended area as well. That means this is an improvement for them.

Contrary to your bizarre letter to the FCC where you state they are discontinuing POTS or any sort of physical lines/infrastructure and also terminating jobs that support those, they are in fact terminating a level of service on those lines because nobody is using it. Who makes only local calls in 2017? The service is useless. You really do a great job publicly embarrassing yourself when you are totally clueless about things.
